What is eye makeup? What are the steps to applying eye makeup?

In simple terms, **eye makeup** focuses on enhancing your eyes and eyebrows. Products such as eyeliner, eyeshadow, mascara, kajal, and other essentials can define your natural features or create an elaborate glam look. Whether you are getting ready for the office, a casual outing, or a party, the right eye makeup products can help you achieve a polished and expressive look.

WHAT IS EYE MAKEUP?

Step 1: Blend

The secret to flawless makeup is blending. Blend the product across the eyelid with an eyeshadow brush or your ring finger.

Step 2: Eyeliner

After a basic eyeshadow looks for the workplace, it's time to experiment with traditional winged eyeliner (cat eyes). Make little wings on each corner of the eyes until they are equal in size and length. For a thick cat-eye effect, connect the wing to the inner corner of the eyes. Fill in the rest of the liner's outline with Waterproof Soft-Matte Eyeliner.

Step 3: Prime

When applying eyeshadow, make your base (eyelids) smooth for easy blending and to make the colour pop. As a base, apply an eye primer or concealer over your eyes.

Step 4: Use Neutral Shades

For everyday makeup, choose soft, natural shades that complement your overall look. **Makeup for the cheeks** can add warmth, definition, and a healthy-looking flush to your face. Use a blush in a buildable formula and apply it lightly to the cheeks, blending outward for a seamless finish.
